SUMMARY

PHP & Laravel Developer with 2+ years of professional experience in designing, developing, and maintaining scalable web applications. Proficient in Laravel, PHP, MySQL, JavaScript and Vuejs with expertise in creating secure RESTful APIs using Laravel Sanctum and integrating third-party APIs. Skilled in backend development, database optimization, debugging, and performance tuning. Experienced in delivering end-to-end solutions including ERP systems, e-commerce platforms, and custom web applications. Strong knowledge of code quality standards, clean architecture, and best practices for maintainable applications.

SKILLS

Backend Development : PHP, Laravel, REST API (Laravel Sanctum, JWT)

Frontend Development: React.js, JavaScript, jQuery, Ajax, HTML5, CSS3, Bootstrap

Database Management: MySQL (Query Optimization, Joins, Indexing)

Tools & Version Control: Git, GitHub, Postman, VS Code, Cursor AI, cPanel, Docker

Other Skills: API Integration, Performance Optimization

EXPERIENCE

Web Developer

Internet Moguls

04/2025 Delhi, India

- Developed and managed full-stack web applications for the hospitality and event management industry.
- Focused on clean UI/UX design, mobile responsiveness, and high-performance backend systems.
- Built a custom CRM for blog management.
- Implemented dynamic hotel websites with booking system integrations.
- Integrated Google Sheets API to automatically store and sync booking and inquiry data.
- Worked on both frontend (HTML, Bootstrap, JavaScript, jQuery) and backend (Laravel, PHP, MySQL, REST APIs) to deliver scalable, user-friendly, and secure solutions.

Web Developer

Nirvaat Internet Private Limited

04/2024 - 04/2025 Noida, India

- Developed and maintained multiple web projects using PHP, Laravel, Magento, MySQL, and JavaScript.
- Implemented real-time synchronization for order status across multiple users, ensuring that when one user accepts an order, it automatically reflects for other users to prevent duplicate processing.
- Designed and implemented various key modules such as Order Management, Inventory Tracking, Real-time Notifications, and Admin Role Management to enhance system efficiency and user experience.
- Managed and customized an e-commerce platform in Magento, including dashboards for warehouse operations.
- Managed and upgraded a warehouse management dashboard in PHP, migrating the system from PHP 7.4 to PHP 8.2 with new module development and issue resolution.
- Designed and developed mobile and web applications for warehouse operations using jQuery and Onsen UI, connected with backend APIs.
- Created and scheduled cron jobs for automated order processing, inventory updates, and background tasks on live servers.
- Developed key modules such as Order Management, Inventory Tracking, Real-time Notifications, Admin Role Management, and Delivery App Integration to improve efficiency and user experience.
- Enhanced system performance, debugging, and bug fixing, ensuring smooth operations across connected applications (Magento e-commerce, warehouse dashboard, mobile apps, and delivery system).

EXPERIENCE

Web Developer

Freelance

📅 2021 - 2024 📍 Remote

- Completed several freelance projects involving e-commerce websites, real estate platforms, API integrations, and business websites using technologies like PHP, Laravel, MySQL, and JavaScript.
- Specialized in creating responsive websites using PHP, Laravel, HTML, CSS, JavaScript, and jQuery.
- Focused on SEO-friendly designs, performance optimization, and maintaining high-quality code standards.

EDUCATION

Bachelor's Of Technology In Computer Science

Kanpur Institute of Technology

📅 09/2021 - 07/2024 📍 Kanpur, India

Diploma In Computer Science

Govt. Polytechnic Saharanpur

📅 07/2017 - 10/2020 📍 Saharanpur, India

PROJECTS

School ERP

- Developed a comprehensive School Management System (ERP) that includes modules for student registration, attendance tracking, exam and grade management, staff management, fee collection, timetable scheduling, and real-time notifications. The system enhances administrative efficiency and provides a centralized platform for managing academic and operational activities.
- Developed a comprehensive School Management System (ERP) with modules for student registration, attendance tracking, exam and grade management, staff management, fee collection, timetable scheduling, and real-time notifications.
- Enhanced administrative efficiency by centralizing academic and operational activities into a single platform.
- Implemented secure role-based access for students, teachers, and administrators to ensure data privacy and smooth operations.
- Designed the system to be scalable and user-friendly, improving overall productivity for educational institutions.

Job Portal (Next Naykari)

- Developed a dynamic real estate website featuring property listings, advanced search and filter functionality, user and agent authentication, and a fully functional admin panel to manage properties, users, and site content. Ensured a seamless user experience with secure login systems and intuitive property browsing.
- Developed a feature-rich job portal enabling recruiters to post job openings and candidates to apply seamlessly.
- Implemented role-based authentication (Recruiter, Candidate, Admin) with secure login and access control.
- Designed dynamic dashboards for recruiters (job postings, applicant tracking) and candidates (job applications, profile management).
- Integrated advanced job search and filtering options for candidates with parameters like location, salary, skills, and experience.
- Built application tracking workflows including job status updates, email notifications, and recruiter-candidate communication.
- Implemented REST APIs for job postings, applications, and notifications to support web and mobile platforms.
- Focused on mobile responsiveness, performance optimization, and user-friendly UI/UX to ensure a smooth experience for all users.
